\$179.95

Golden Peony I pairs oversized ivory blooms with olive foliage and a deep charcoal ground, creating a floral composition that feels both soft and dramatic. The oil-painted surface shows expressive brushwork and layered texture, while delicate gold accents catch the light and echo the slim frame for a polished finish. Its tall vertical format works beautifully in a bedroom, living room, or entryway, where the moody palette and luminous petals can add height, elegance, and a contemporary botanical presence.
