Optimus White Nightstand

Short Description:

SKU: 312393

\$199.95

The Optimus White collection is built around one idea: a bedroom should feel like a designed space, not a collection of separate purchases. It starts with the bed — a sculpted, chevron-cut headboard with built-in white LED lighting that turns the room's focal point into a light feature. From there, the two-tone white-and-grey finish, brushed metal pulls, and center woodgrain inlay carry through every piece: the 6-drawer dresser, the beveled mirror, the 2-drawer nightstand, and the 5-drawer chest. Every drawer in the collection is full-extension, so storage is as functional as the collection is striking. This is a bedroom set for customers who want their space to make a statement the moment the light switches on.
